CHESSER CHEMICALS Pty., Ltd. provides the information submitted in this Product Information Sheet based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve users from the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.

Product: FABRIC SOFTENER

Fabric Softener is an opaque blue liquid with a fresh floral fragrance. It is added to the final rinse to soften the fabric, reduce static build up and also to assist with ironing

FEATURES

- Fabric Softener has a long lasting fresh floral fragrance. The same fragrance is used in Chesser laundry detergent powders, and in the floral liquid laundry detergent. This means the fragrance can build up in the wash and rinse to leave your clothes smelling clean and fresh.
- Fabric Softener is concentrated so only 25ml is needed to soften fabrics and reduce static build up. This is especially important in tumble dried clothes which can give strong static shocks when pulled out if softener are not used

HOW & WHERE TO USE

- Fabric Softener must be added to the final rinse. This stops reaction with detergents and rinsing away. Fabric Softener can be added to dispensers, or poured manually into the machine. For an average sized load use 25ml softener. Pour into the water not directly onto the clothes. Only use a fabric softener if the water is clear. If it is murky due to work on the mains or from using untreated river water discontinue use until water quality improves. If used in dirty water it will pull the discolouration onto the fabric making a stain.
- Fabric Softener may also be used as an ironing aid. Add 25ml to 500ml trigger spray and top up with water. Spray lightly over clothes.

SAFETY AND FIRST AID

HAZARDOUS according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals

Classification of the substance or mixture:
Eye damage/irritation - Category 2

SIGNALWORD:

WARNING

Exclamation mark

Hazard Statements

Physical hazards

Health hazards

H319

Causes serious eye irritation

Precautionary Statements

General Precautionary Statements:

P102 Keep out of reach of children

Prevention Precautionary Statements:

P264 Wash hands thoroughly after handling

P280 Wear protective gloves and eye protection

Response Precautionary Statements:

P305 351 338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do – continue rinsing
