CHESSER CHEMICALS Pty., Ltd. provides the information submitted in this Product Information Sheet based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve users from the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.

Product: **FIVE STAR LAUNDRY POWDER**

Premium Grade One Shot Laundry Powder

FEATURES & BENEFITS

- Complete one shot powder containing built in oxygen bleach and enzymes. For most washes simply add the Five Star with no pre-treatment or extra bleaches required. This makes it extremely easy to use.
- Five Star has a controlled foam profile making it suitable for use in front or top loading machines.
- **Five Star contains a photochemical bleaching agent. When soaking in daylight or line drying it absorbs light energy and transmits it to oxygen molecules, activating them to become a bleaching agent. This action helps remove any residual staining whilst the clothes are drying.**
- Five Star contains high levels of water softening agents. This means it works well in all water conditions giving outstanding results every time.
- Five Star also contains special additives to control the activity of the oxygen bleach at lower temperatures.

HOW & WHERE TO USE

- Five Star is extremely easy to use. Domestic front loader – add 1/4 cup per wash. Top loader – add 1/3 cup per wash. For commercial machines use 50g (1/4 cup) per 5kg capacity. So for a typical 20kg machine add 1cup of Five Star.
- Heavily soiled clothes need extra treatment for best results. Either carry out a prewash with extra Five Star, or add extra Five Star to the main wash. Oily stains can be pre-treated by spraying with Chesser Prewash Stain Remover. If the stains are bleachable, such as wine, cordial or coffee, the bleaching power can be increased by adding some Chesser Bright which contains more oxygen bleach than Five Star.
- Five Star gives best results between 40 - 70°C, as this temperature activates the oxygen bleach.
- Do not add chlorine bleach as it is incompatible with the oxygen bleach in Five Star.
- Five Star can also be used as a soak for heavily soiled linen. Add 1/8 cup to a bucket, or 1/4 cup to a laundry sink.

SAFETY INFORMATION

HAZARDOUS according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals

SIGNAL WORD: DANGER

Health hazards

H318	Causes serious eye damage
H315	Causes skin irritation
H335	May cause respiratory irritation
