Note:
CHESSER CHEMICALS Pty., Ltd., provides the information submitted in this Product Information Sheet based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve users from the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.

Product: ENDURE TYRE GEL

ENDURE TYRE GEL is a solvent based long lasting, high gloss tyre dressing that remains on your car tyres even through washing and rain. ENDURE TYRE GEL transforms old tyres to looking new with one instant wipe and returns them to a natural black sheen. Overspray runs and drips are minimised due to GEL FORMULATION

FEATURES

- ENDURE TYRE GEL will give a long lasting high shine protective finish to Tyres.
- ENDURE TYRE GEL protects against UV damage and Tyre Browning
- ENDURE TYRE GEL is a concentrated gel formulation for easy even application.

APPLICATION

- Apply ENDURE TYRE GEL on a cool, clean tyre using a foam applicator or clean cloth and wipe evenly over the wall of the tyre. Wipe off excess to prevent staining and spin off.
- If this product gets on the wheel or the body of the car, quickly wipe off with a damp paper towel, sponge, or cloth.
- Do not apply to the tread of the tyre. Ensure the side wall of the tyre is free of dirt and old coatings so the dressing has maximum contact with the rubber. For a high gloss re-apply a second coat after waiting 10 minutes or when touch dry. For less shine wipe immediately after application and buff with a clean cloth.

SAFETY AND FIRST AID

Read SDS before use

MEDIUM Hazard Rating

Chesser Traffic Lights Hazard indicator system

HAZARDOUS according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals (GHS).

SIGNAL WORD

Health hazards

DANGER

H304 May be fatal if swallowed and enters airways

AUH066 Repeated exposure may cause skin dryness or cracking
