Note:
CHESSER CHEMICALS Pty., Ltd. provides the information submitted in this Product Information Sheet based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve users from the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.

Product: SUPER SOFT

Super Soft is an extra mild cleanser designed for those who need to wash their hands frequently.

FEATURES

- Super soft is a creamy pearlescent liquid with a mild cosmetic fragrance. It is an extra mild cleanser designed for staff in nursing homes and hospitals that need to wash their hands on a very frequent basis. It is also suitable for washing the face and all over the body.
- Super Soft is based on a blend of extremely mild cleansers commonly used in baby shampoos and other mild products. The soft cleansers do not degrease the skin, even with frequent washing.
- Super Soft contains a blend of special moisturisers and emollients to help protect the skin and leave it feeling silky soft.
- Super Soft has a pH of 6 and so will not affect the pH balance of the skin, unlike soap based products which often have a pH over 10.

HOW & WHERE TO USE

- Super Soft can be used through most refillable soap dispensers. Simply squirt a small amount onto wetted skin, work into a lather and rinse off.
- In the shower add a small amount to a sponge or face cloth. Add water and squeeze the sponge or face cloth to form a foam, then apply all over the body. This will leave the skin feeling beautifully soft.
