Note:
CHESSER CHEMICALS Pty., Ltd., provides the information submitted in this Product Information Sheet based on our current knowledge and experience. In view of the many factors that may affect processing and application, these data do not relieve users from the responsibility of carrying out their own tests and experiments; neither do they imply any legally binding assurance of certain properties or of suitability for a specific purpose. It is the responsibility of those to whom we supply our products to ensure that any proprietary rights and existing laws and legislation are observed.

Product: ULTRA SHINE

ULTRA SHINE is added to the final rinse in dishwashing machines to make the water sheet off evenly to reduce drying time and leave items sparkling.

FEATURES

- ULTRA SHINE can be used in all dishwashers from large commercial machines down to domestic.
- ULTRA SHINE is designed for use in hard water areas in conjunction with MAGNUM. The special additives in ULTRA SHINE will keep the rinse lines and jets scale free, whilst the MAGNUM keeps the rest of the machine scale free.
- ULTRA SHINE is a concentrated ULTRA SHINE. Only a small amount is needed per cycle so a drum lasts a long time. The special blend of low foam detergents used makes the water sheet off easily, leading to reduced spotting and streaking, making glasses sparkle.

HOW & WHERE TO USE

- In commercial dishwashers ULTRA SHINE is usually added through an automatic feeder. This is adjusted by a Chesser technician to give optimum results.
- In domestic machines simply add ULTRA SHINE to the rinse aid holding tank when required.

SAFETY AND FIRST AID

LOW Hazard Rating

Chesser Traffic Lights Hazard indicator system

HAZARDOUS according to the criteria of the Globally Harmonised System of Classification and Labelling of Chemicals

SIGNAL WORD: WARNING

Emergency Response No: CHEMWATCH 1800 951 288

RECOMMENDED PPE NOT APPLICABLE
